NOTICE TO THE TRADE – DeCA NOTICE 16-74

SUBJECT: Natural & Organic Products Specialty Supplier

The purpose of this notice is to advise Industry that the Defense Commissary Agency (DeCA) will be accepting presentations June 14-16, 2016, by appointment only, from specialty suppliers with capability to provide all-inclusive support for segregated natural and organic (N/O) product sets. Presentations should include recommendations for product assortment, placement and merchandising strategy, and product delivery method to support segregated, store within a store, sets at two new commissaries: Jacksonville NAS, Florida, scheduled to open September 2016 and Fort Belvoir, Virginia, scheduled to open spring 2017.

Presentation appointments must be scheduled by close of business June 6.

DeCA currently merchandises N/O products as either integrated/segregated or fully integrated within category sets depending on the category. N/O segregated, store within a store, sections are planned for new commissaries at Jacksonville NAS and Fort Belvoir; along with fully integrated or integrated/segregated mainstream N/O products, as appropriate by category. These approaches are defined by DeCA as follows:

- Segregated (Store within a Store): N/O items merchandised within a specific section of the store which is dedicated to N/O products.
- Integrated/Segregated: N/O items are merchandised in line with category, segregated at the beginning or end of the category set
- Fully Integrated: N/O items are merchandised within category, side by side with like items

While large multinational CPGs dominate the N/O market when it comes to share of dollar sales, the N/O market is comprised of many specialty or niche type companies. Using a single supplier for the N/O segregated, store within a store, sections planned for Jacksonville NAS and Fort Belvoir will reduce the need for minimum shipments and higher case packs that may otherwise be required with a frequent delivery system (FDS) delivery method, or a multi-supplier strategy.

DeCA is seeking presentations from specialty suppliers with all-inclusive capability to support a N/O products program to include delivery of product, placement and merchandising strategy for the segregated (store within a store) set, and a product assortment that complements mainstream N/O products to be merchandised throughout new commissaries at Jacksonville NAS and Fort Belvoir.

As part of the presentation and evaluation process potential suppliers will:

- Evaluate DeCA's current N/O stock assortment available at Attachment A. Fresh produce and fresh meat are excluded from this effort.

- Identify stock assortment opportunities for N/O segregated, store within a store concept, with consideration of complementing DeCA's current N/O stock assortment.
- Recommendations may include identifying items currently included in DeCA's stock assortment to be moved to the segregated section or dual-located in both the main store and segregated set; such as, DeCA's current General Health set that includes primarily pure-play Gluten Free products that are natural and organic and should be identified to move to the segregated set.
- Provide the following retail sales data for recommended items by category/planogram as well as by total N/O:
  - Retail movement dollars/units history for 52 and 26-week periods ending April 30;
  - Product ranking/share;
  - Savings over retail;
  - Retail distribution (ACV).
- Identify and provide recommendations of item types: certified organic items that are in accordance with USDA standards, organic, natural, gluten free.
- Provide recommended high-level planograms (layout, flow, category/segment, number of items) for the segregated section. Detailed planogram recommendations will be required within 30 days of product assortment decisions. Store layouts for Jacksonville NAS and Fort Belvoir are at Attachment B.

Additional requirements of the program include:

- Electronic Data Interchange pricing preferred; Web pricing will be considered.
- Swell allowance to cover hidden damage and product out-of-code/expiration date issues.
- Vendor stocking will be required for most items based on product category as stated in DeCA Manual 40-5.1, Grocery Department Operations, Chapter 5, Section 5-6.

Presentations will be accepted June 14-16, 2016. Suppliers may provide additional information to support these criteria and additional data to support product assortment and placement presentation, as appropriate. All presentations will be conducted at DeCA Headquarters, 1300 E Avenue, Fort Lee, Virginia 23801-1800, and should be no longer than 90 minutes. Appointments must be scheduled by close of business June 6 by contacting Ms. Robbie Desen at 804-734-8000, extension 86380 or, robbie.desen@deca.mil or Ms. Tiwona Minnick at extension 86457 or tiwona.minnick@deca.mil.

DeCA anticipates making a decision based on this request by the end of June with shipments to the Jacksonville NAS store occurring in early September. Layout and reset assistance for the new Jacksonville commissary will be expected during the timeframe of September 1-10.

Segregated set(s) will be reviewed utilizing the category management review process at a minimum 26 weeks following each store opening. Savings compared to retail AOC, dollars/units movement compared to RM and AOC, product ranking/share, retail distribution (ACV), and sales index (sales to linear footage compared to main store sets) will be compared for existing products to determine SKU efficiency, and for potential products to determine changes to the assortment. This review will also serve to assess overall performance of the segregated set(s) as products are merchandised separate from category primary locations sets.

If you have further questions, please contact Mr. Gordon Jones, Deputy Director for Sales, at (804) 734-8000 at extension 48240.
